

FIG. 1 is a schematic diagram of a network system. The network system includes a central network (110) and several devices connected to it. The devices include a mobile phone (30), a tablet (50), a laptop (60), and four servers (100, 110, 120, 80). The network (110) is represented by a cloud shape. The mobile phone (30) is connected to the network (110) via a line. The tablet (50) is connected to the network (110) via a line. The laptop (60) is connected to the network (110) via a line. The servers (100, 110, 120, 80) are connected to the network (110) via lines. The servers (100, 110, 120, 80) are represented by rectangular shapes with a small square at the top.
